Standing Seam Options

Ends — Our Standing Seam and R Panel awnings come with the option of an open end or a closed end. You can choose from mill finish, aluminum, painted or powder coated frames.

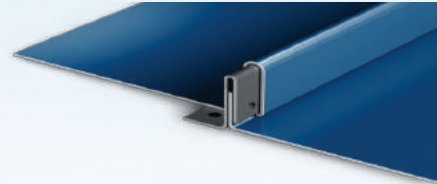

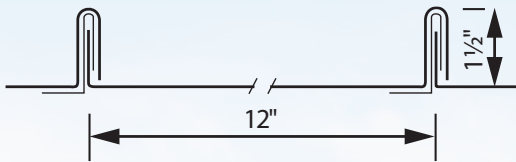

Closed End

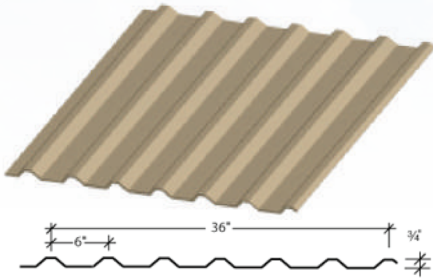

Open End

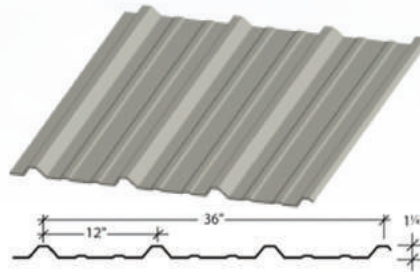

Standing Seam Concealed Fastening System — Metal panels with a raised seam that are typically fastened down to the roof deck using hidden clips and fasteners. A commercial metal canopy is available in steel or aluminum.

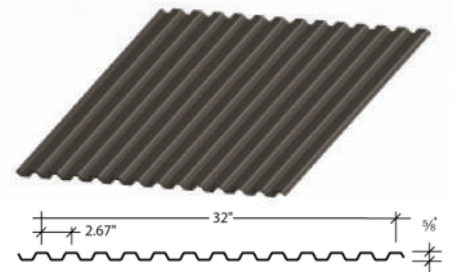

R Panel - Exposed Fastening System — Roof panels which overlap each other and attach to the structure using self-drilling fasteners. A pre-engineered metal canopy is used in a commercial and industrial application.
